

SHUTDOWN, TURNAROUND, OUTAGE (STO) EXECUTION EXCELLENCE

3-DAY WORKSHOP | 28 – 30 OCTOBER 2025

CALGARY WINTER CLUB, CALGARY, AB | CANADA

Gain planning, scheduling, and cost controlling skills through hands-on exercises using templates, tools, and technology such as P6 and Excel-based dashboards that you can immediately implement at your workplace. This unique hands-on experience will teach you how to improve safety, quality, and tool-time efficiency, with the lowest risk/cost and shortest process outage window possible.

TARGET AUDIENCE

Event Managers | Process Operators | Planners
Schedulers | Logistics Coordinators | Execution
Coordinators | Project / Cost Analysts
STO Execution Teams

FORMAT

- Small In-Person Group
- 50% Hands-On Exercises | 50% Interactive Brainstorming
- Applying Concepts, Sharing Experiences, and Brainstorming Discussions

FACILITATOR

EJ (Ted) Lister is an internationally recognized subject matter expert in effective planning, scheduling, and controls for heavy industry maintenance events and complex capital projects.

Ted has acquired three decades of experience under the mentorship of a unique combination of seasoned practitioners and industry leaders in maintenance, reliability, shutdowns, turnarounds, outages, and capital projects in hydrocarbon and mineral processing. He has worked for major operators such as Shell, Suncor, DOW, ConocoPhillips, Petronas, and many more. His specialized knowledge in agile scheduling with MS Project® and Primavera™ P6 is unprecedented.

Ted has delivered 200+ public and private (customized) workshops globally, and is currently working on AI-augmented planning, scheduling, and controls.
